## **Plan Do Check Act - An approach to Decontamination**

**Nicole Lapanaitis**

Healthcare quality management systems that utilise a risk-based approach, with a particular emphasis on the integration of standards and guidelines. By incorporating established standards and guidelines into quality management processes, healthcare organizations can ensure adherence to best practices and improve patient safety and care outcomes.

The presentation will highlight the importance of standards and guidelines in healthcare quality management. It will cover the role of national and international standards, as well as their significance in promoting consistent and evidence-based practices across healthcare settings.

One focus of the presentation is on the application of a risk-based approach and explores how a risk assessment can be performed.

The presentation emphasises the integration of risk management principles into the development and implementation of quality improvement initiatives.
